

Homemade Cleaning Products Recipe

All-Purpose Cleaner	Put equal parts white vinegar & water in a spray bottle. Add a few drops of lemon juice to make it smell pretty (but don't worry, the vinegar smell dissipates as soon as it dries).
Carpet Stain Remover	Mix equal parts baking soda (or borax), salt, & white vinegar. Mix into a paste and apply to the stain. Let it dry, then vacuum it up.
Drain Cleaner	Pour half a cup of baking soda down the drain, followed by half a cup of vinegar. Let it fizz, then flush with hot water.
Moldy Grout Remover	Mix half a cup of hydrogen peroxide with one cup of water. Spray it on the moldy tiles, let it sit for one hour, then rinse.
Shower Cleaner	Fill a spray bottle with water and add 5-10 drops of tea tree oil. Keep it in your shower. Shake it up and spray down the walls and curtain after each shower. Replace every other week.
Toilet Cleaner	Mix 1/4 c. baking soda with 1 c. vinegar and pour the mixture in the toilet basin. Let it sit for a few minutes, then scrub and flush.
Stainless Steel Polish	Polish stainless steel surfaces with a paste made from vinegar and baking soda, then rinse well.
Washing Machine Cleaner	To clean hoses and unclog soap scum, pour a cup of vinegar in the washing machine and run a normal cycle with no clothes. It's recommended to do this monthly for a sparkling washing machine.
Air Freshener	Throw a few cinnamon sticks or cloves in a pot of water and let it simmer on the stove. You could also use any scent of essential oil that you like.
